### Customer Focus

With a market presence in more than 130 countries around the world, you can be assured that Gunnebo is always close by.

As a customer-focused organisation, we pride ourselves on delivering professional and reliable solutions which address your particular security needs.

We install customised solutions at sites all over the world, ranging from embassies, power plants and airports to prisons, factories and logistics centres.

### Certified Products

All of Gunnebo's products undergo stringent internal quality control procedures at every stage of development and production.

Many are also independently tested and certified by world-renowned institutes. This ensures that our solutions will provide the level of security you require.

### Environmental Policy

The Gunnebo Security Group is strongly committed to creating business sustainability from product development to after-sales service. Each one of our employees is aware of his or her responsibility to protect the environment and act in a socially responsible manner.

### Core Values

Our Core Values – Customer Focus, Commitment to Quality, Professionalism, Integrity and Cooperation – are central to our organisation. They guide us in our day-to-day business, fostering fruitful, long-lasting partnerships and helping support the way we work with you.

The Gunnebo Security Group employs 6 500 people in 25 countries across Europe, Asia, Africa and North America, and has a turnover in excess of €760m. Our solutions protect people, buildings and property, providing security for you, your employees and your customers.

## Total Security for the Nuclear Energy Sector

# Total Security for the Nuclear Energy Sector

*A full range of solutions...*

The security of nuclear power stations, enrichment sites, waste management plants and R&D centres working within the nuclear energy sector, is a major concern for governments and energy providers alike. The threat of disturbance or attack from demonstrators, activists or terrorists, demands a complex and coherent security structure which covers every area of a site.

With our in-depth knowledge of critical infrastructures, considerable technological expertise and a continuously developing range of products and solutions, Gunnebo offers the nuclear energy sector the total security package, ensuring reliability, flexibility and a high-level of quality.

Our extensive experience and skill in access and entrance control, outdoor perimeter protection and electronic security, makes Gunnebo the preferential partner for the nuclear sector the world over.

We provide complete security solutions including equipment, software and value-added services. We are able to lead the process from start to finish, from an initial audit and architecture definition to systems integration, installation and implementation, and of course ongoing maintenance once installation is complete.

*...to provide total security for the nuclear energy sector*

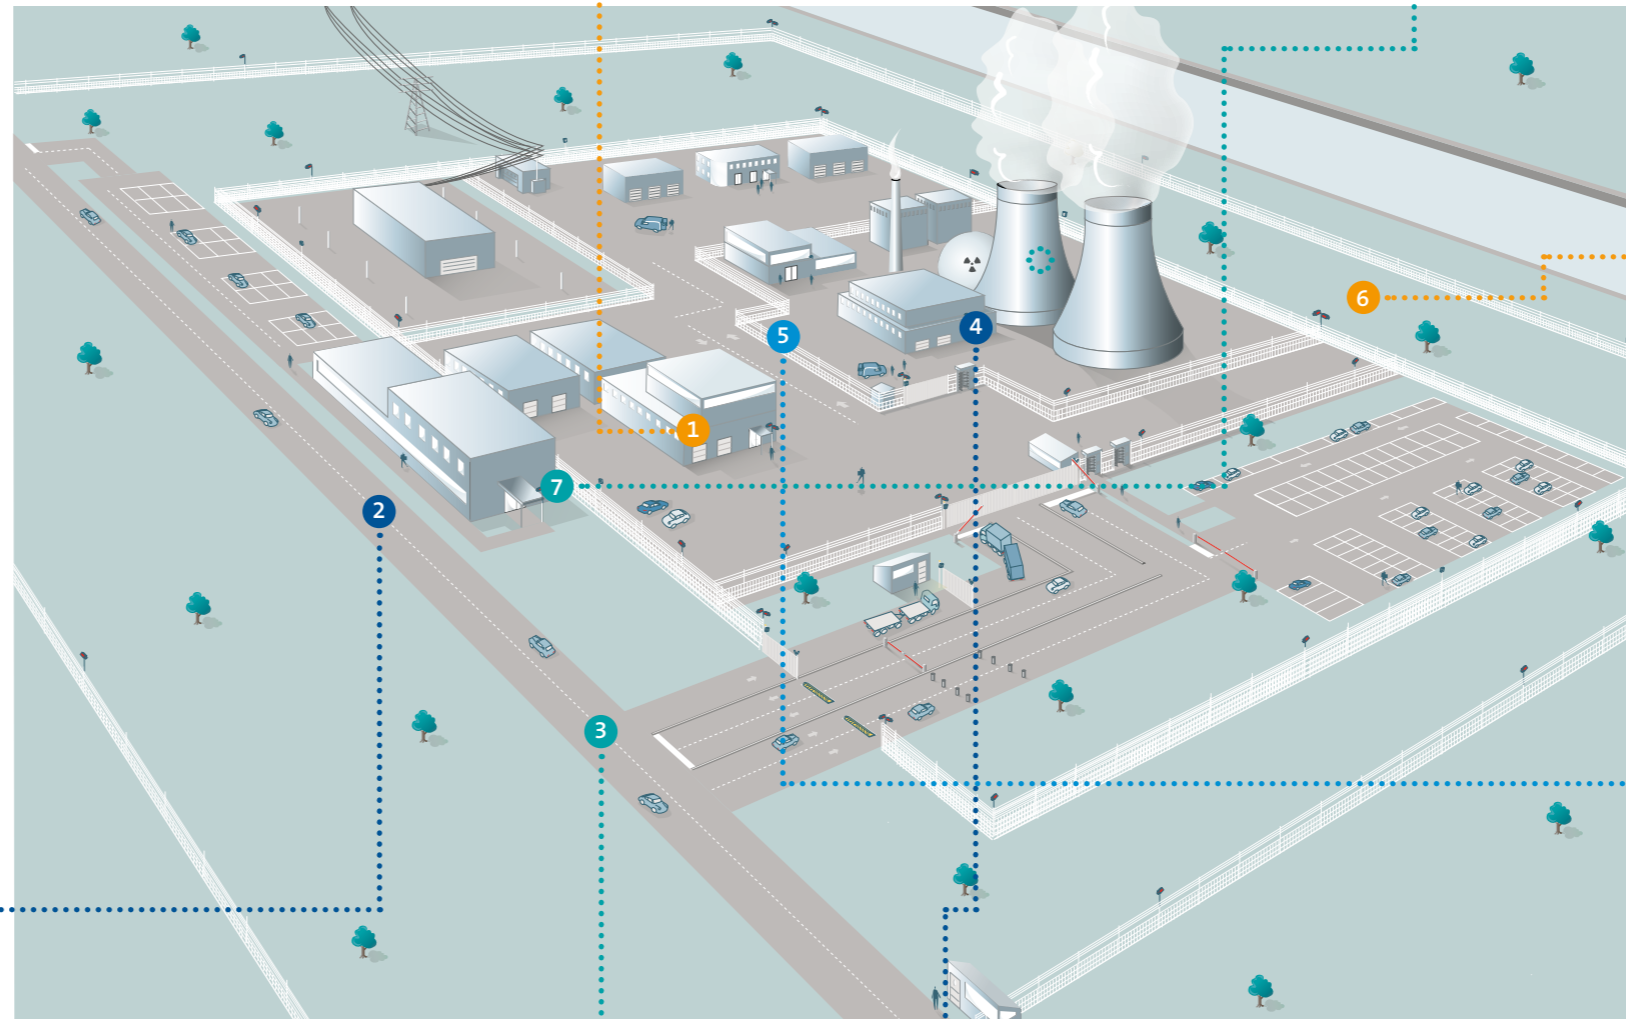

## Secure Storage

Gunnebo protects documents, data media and other valuable items from burglary and fire. Our secure storage range includes safes, vaults and fire-proof cabinets.

## Interior Entrance Control

Gunnebo controls the flow of individuals within the site and protects against attack. Solutions include bullet-resistant and blast-resistant security doors, interlocking doors, turnstiles and partitions.

## Electronic Security

Gunnebo produces and implements a range of electronic security solutions including access control, intruder alarms, CCTV, door management and remote surveillance systems.

## Exterior Perimeter Protection

Gunnebo offers perimeter security to control the flow of people and vehicles into and out of the site. Our extensive range includes gates, fencing, palisades, boom barriers and road blockers.

## Intrusion Detection

Gunnebo provides outdoor detection systems using microwave technology, underground magnetic detectors and sensor cables.

## Perimeter Fencing

Gunnebo secures your various exterior perimeter areas with our range of reliable fencing solutions for high-risk sites.

## High-Security Solutions

Gunnebo protects the plant from forced or unauthorised entry by motor vehicle. Tyre killers and truck stoppers ensure that axles and suspension will be destroyed when a vehicle tries to force entry or escape. For sensitive internal areas, we also provide a wide range of blast-resistant solutions and high-level multi-performance doors.
