

A photograph of a modern retail store interior. In the foreground, a mannequin of a man wearing sunglasses, a white jacket, and blue jeans stands on a white display box. To the left, a glass display case is visible. In the background, there are clothing racks with various items, including handbags and garments. A large poster of a woman is mounted on the wall. The lighting is bright and modern.

# World-Class Retail Security

Gateway's EAS solutions  
have been installed in stores  
all over the world.

## Article Surveillance at its Best

### Gateway – a Swedish Supplier of EAS Solutions for Retail

Gunnebo Gateway AB is a Swedish supplier of complete Electronic Article Surveillance (EAS) solutions for retail. We offer high-quality antennas, tags, labels, detachers and deactivation equipment developed to meet high security and design demands.

With a truly customer focused service organization and presence in 60 countries all over the world, Gunnebo Gateway AB is the perfect business partner, combining local knowledge with international experience.

### Gunnebo Security Group

The Gunnebo Security Group is present world wide. With years of experience delivering security solutions, Gunnebo has unrivalled expertise in secure storage, site protection, entrance control and cash handling. Our solutions protect people, buildings and property, providing security for you, your employees and your customers.

With the diversity of our antenna designs,  
you will always find a solution that fits  
the look of your store.

## Design that Strengthens your Store

We put as much effort into the design of our antennas as you do into the appearance of your store. That is why we offer the market's most diverse range of antenna designs. Regardless of the layout of your store, you can be sure to find a Gateway solution that matches your design and style requirements.

Design

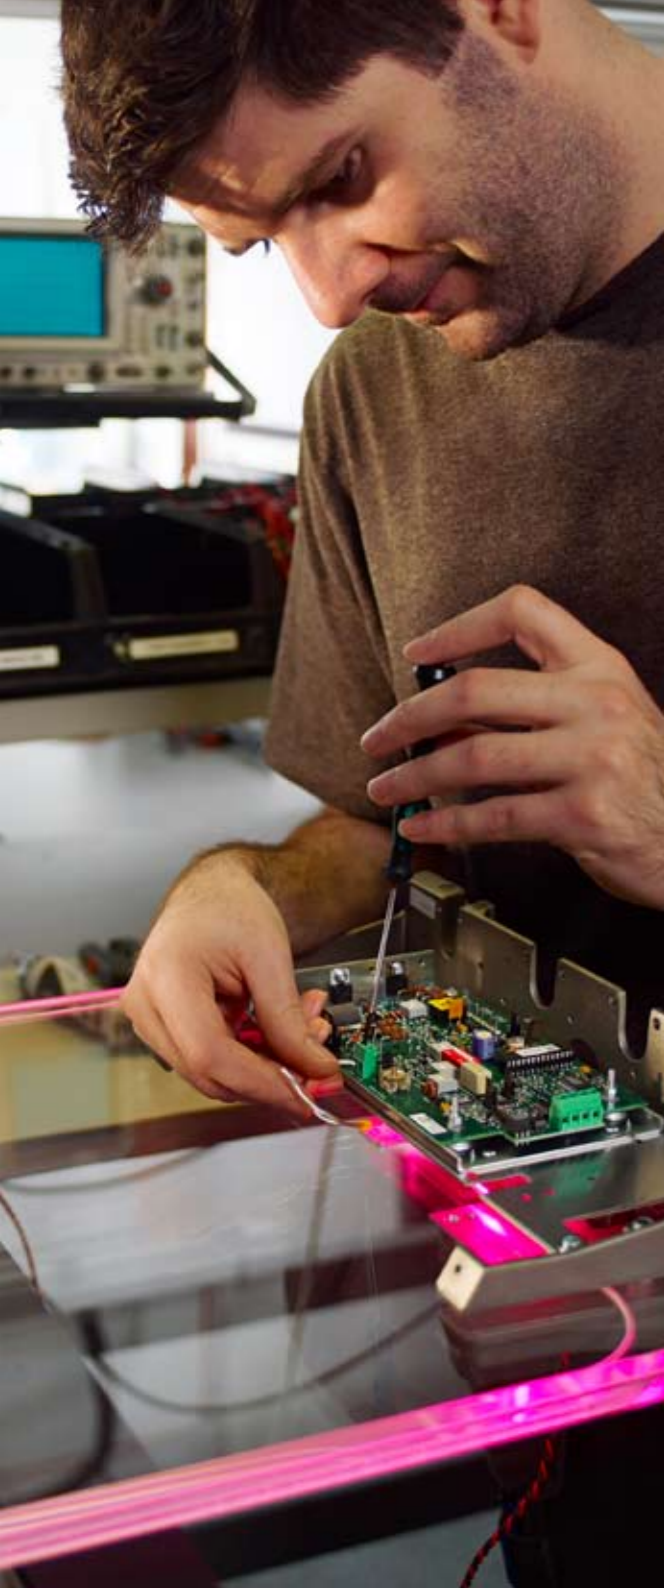

Commitment to quality is one of our core values. Each employee is responsible for maintaining a high level of quality in everything we do.

## Reliability through Quality

In order to guarantee that our solutions are reliable, we are constantly working on assuring and improving quality. Naturally, our products are developed and manufactured according to current norms and standards, and thoroughly tested. By using a Swedish manufacturer, we stay in control all the way.

High Quality

Gateway's antennas are used by practically every type of store and can be placed in entrances or at the checkout.

## A Solution for Every Need

Different products and stores require different article surveillance solutions. No single technology can cater for every need. Gateway is unique in developing, manufacturing and marketing all existing EAS technologies. We have complete solutions to suit any kind of store, from supermarkets and department stores to bookshops and pharmacies.

RF – Radio Frequency

AM – Acousto-Magnetic

EM – Electromagnetic

Technology

People counters and metal detectors  
are just some of the features developed  
through our investment in innovation.

## The Right Solution – Now and in the Future

Thanks to our extensive expertise in developing and manufacturing the RF, AM and EM technologies, we are able to deliver highly customised security products. We run an ongoing programme of in-depth product research and development to ensure that we adapt to the changing demands of customers and to new technological advancements. We will always have the right solution for you.
