

Rosengrens Callisto Dep

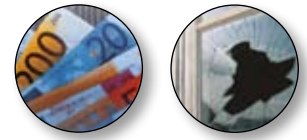

Burglary protection of your valuables

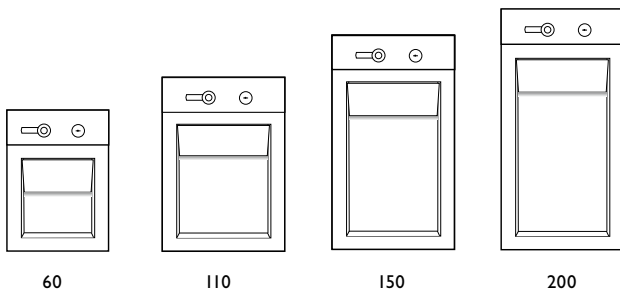

Rosengrens Callisto Dep is a burglary-resistant deposit safe that has been tested and certified according to the European standard EN 1143-2 in Grades DI and DII. Cash or valuables can easily be deposited into the safe while it remains locked, which means that personnel without access to codes or keys can make deposits at any time of the day or night. The deposit drawer is equipped with an anti-fishing device to prevent anyone reaching the contents of the safe through the drawer. Available in four sizes, from 45 to 180 litres, Callisto Dep is designed for strength and security at a reduced overall weight.

*Useable volume below deposit and anti-fishing device.

Burglary protection: Rosengrens Callisto Dep has been tested by ECB•S in accordance with the European standard for deposit safes and has been awarded the EN 1143-2 certification in Grades DI and DII. The steel boltwork of the solid door has a three-way moving action. Both the locks and the boltwork are protected by reinforced anti-drilling plates and for added security, the boltwork has been fitted with an active re-locker. In addition, to prevent the contents of the safe being reached via the deposit drawer, an anti-fishing device is in place.

Locks: The deposit drawer is fitted with a Class A key lock as standard, whereas the safe into which the deposits are made can be equipped either with a Class A key lock or a Class B electronic lock. All locks have been tested by ECB•S in accordance with the recognised EN 1300 standard for high-security locks.

Design: With Callisto Dep's innovative barrier material, not only is the safe protected against burglary, but the total weight of the safe is significantly reduced, making it much lighter than other safes of the same class. This cuts both the time and costs involved in transportation and installation, and makes the safes suitable for floors which cannot support heavy loads.

Callisto Dep has a modern, light-grey finish, suitable for most office environments, and the door handle and other furnishings have been ergonomically designed for ease of use.

Quality and environmental management systems: Rosengrens Callisto Dep deposit safes are manufactured in accordance with ISO 9001 for quality management systems and ISO 14001 for environmental management systems.

Rosengrens Product Guidelines: The construction of Callisto Dep deposit safes has been tested and approved in accordance with Rosengrens Product Guidelines, based on the relevant European standards. The aim is to check user-friendliness, safety and product lifecycle as an assurance to customers that our products will live up to the highest expectations.
